Herptile Survey - 2nd Quadrant

1. An area of *Tribulus*, *Portulaca*,  
and *Baerhaavia* interspersed with  
flat stones was marked off in a  
large square 24 ft. on each side.
2. The loose rocks were raised  
and checked for the presence  
of skinks or geckoes.
3. Results: As indicated by the  
accompanying map, 3 snake-eyed  
skinks and 3 mourning geckoes  
were found under rocks. Two  
se skinks were found in  
*Tribulus* near a large rock.  
Four clutches (2 eggs/clutch) of  
lizard eggs (probably gecko) were  
found, under a large rock in the  
center of the area, under which  
the 3 geckoes were also found.

One of the geckoes was ~~pregnant~~<sup>gravid</sup>  
with two eggs.

4. One Snake-eyed Skink and one  
Mourning Gecko (the gravid female)  
were collected. Two eggs were collected.
5. The study area was located  
on level land on the western  
(leeward) side of the island.  
The area was surveyed at  
ca. 1230.
6. Small spiders and beetles were  
found under the rock where  
the eggs were collected. No  
crabs were found in the study  
area.

Herpetile Survey - 18 Feb 1967  
2nd Quadrant

○ Partially buried rocks

○ Loose rocks

VV Beach grass (Digitaria)

Boerhavia

Portulaca

Tribulus

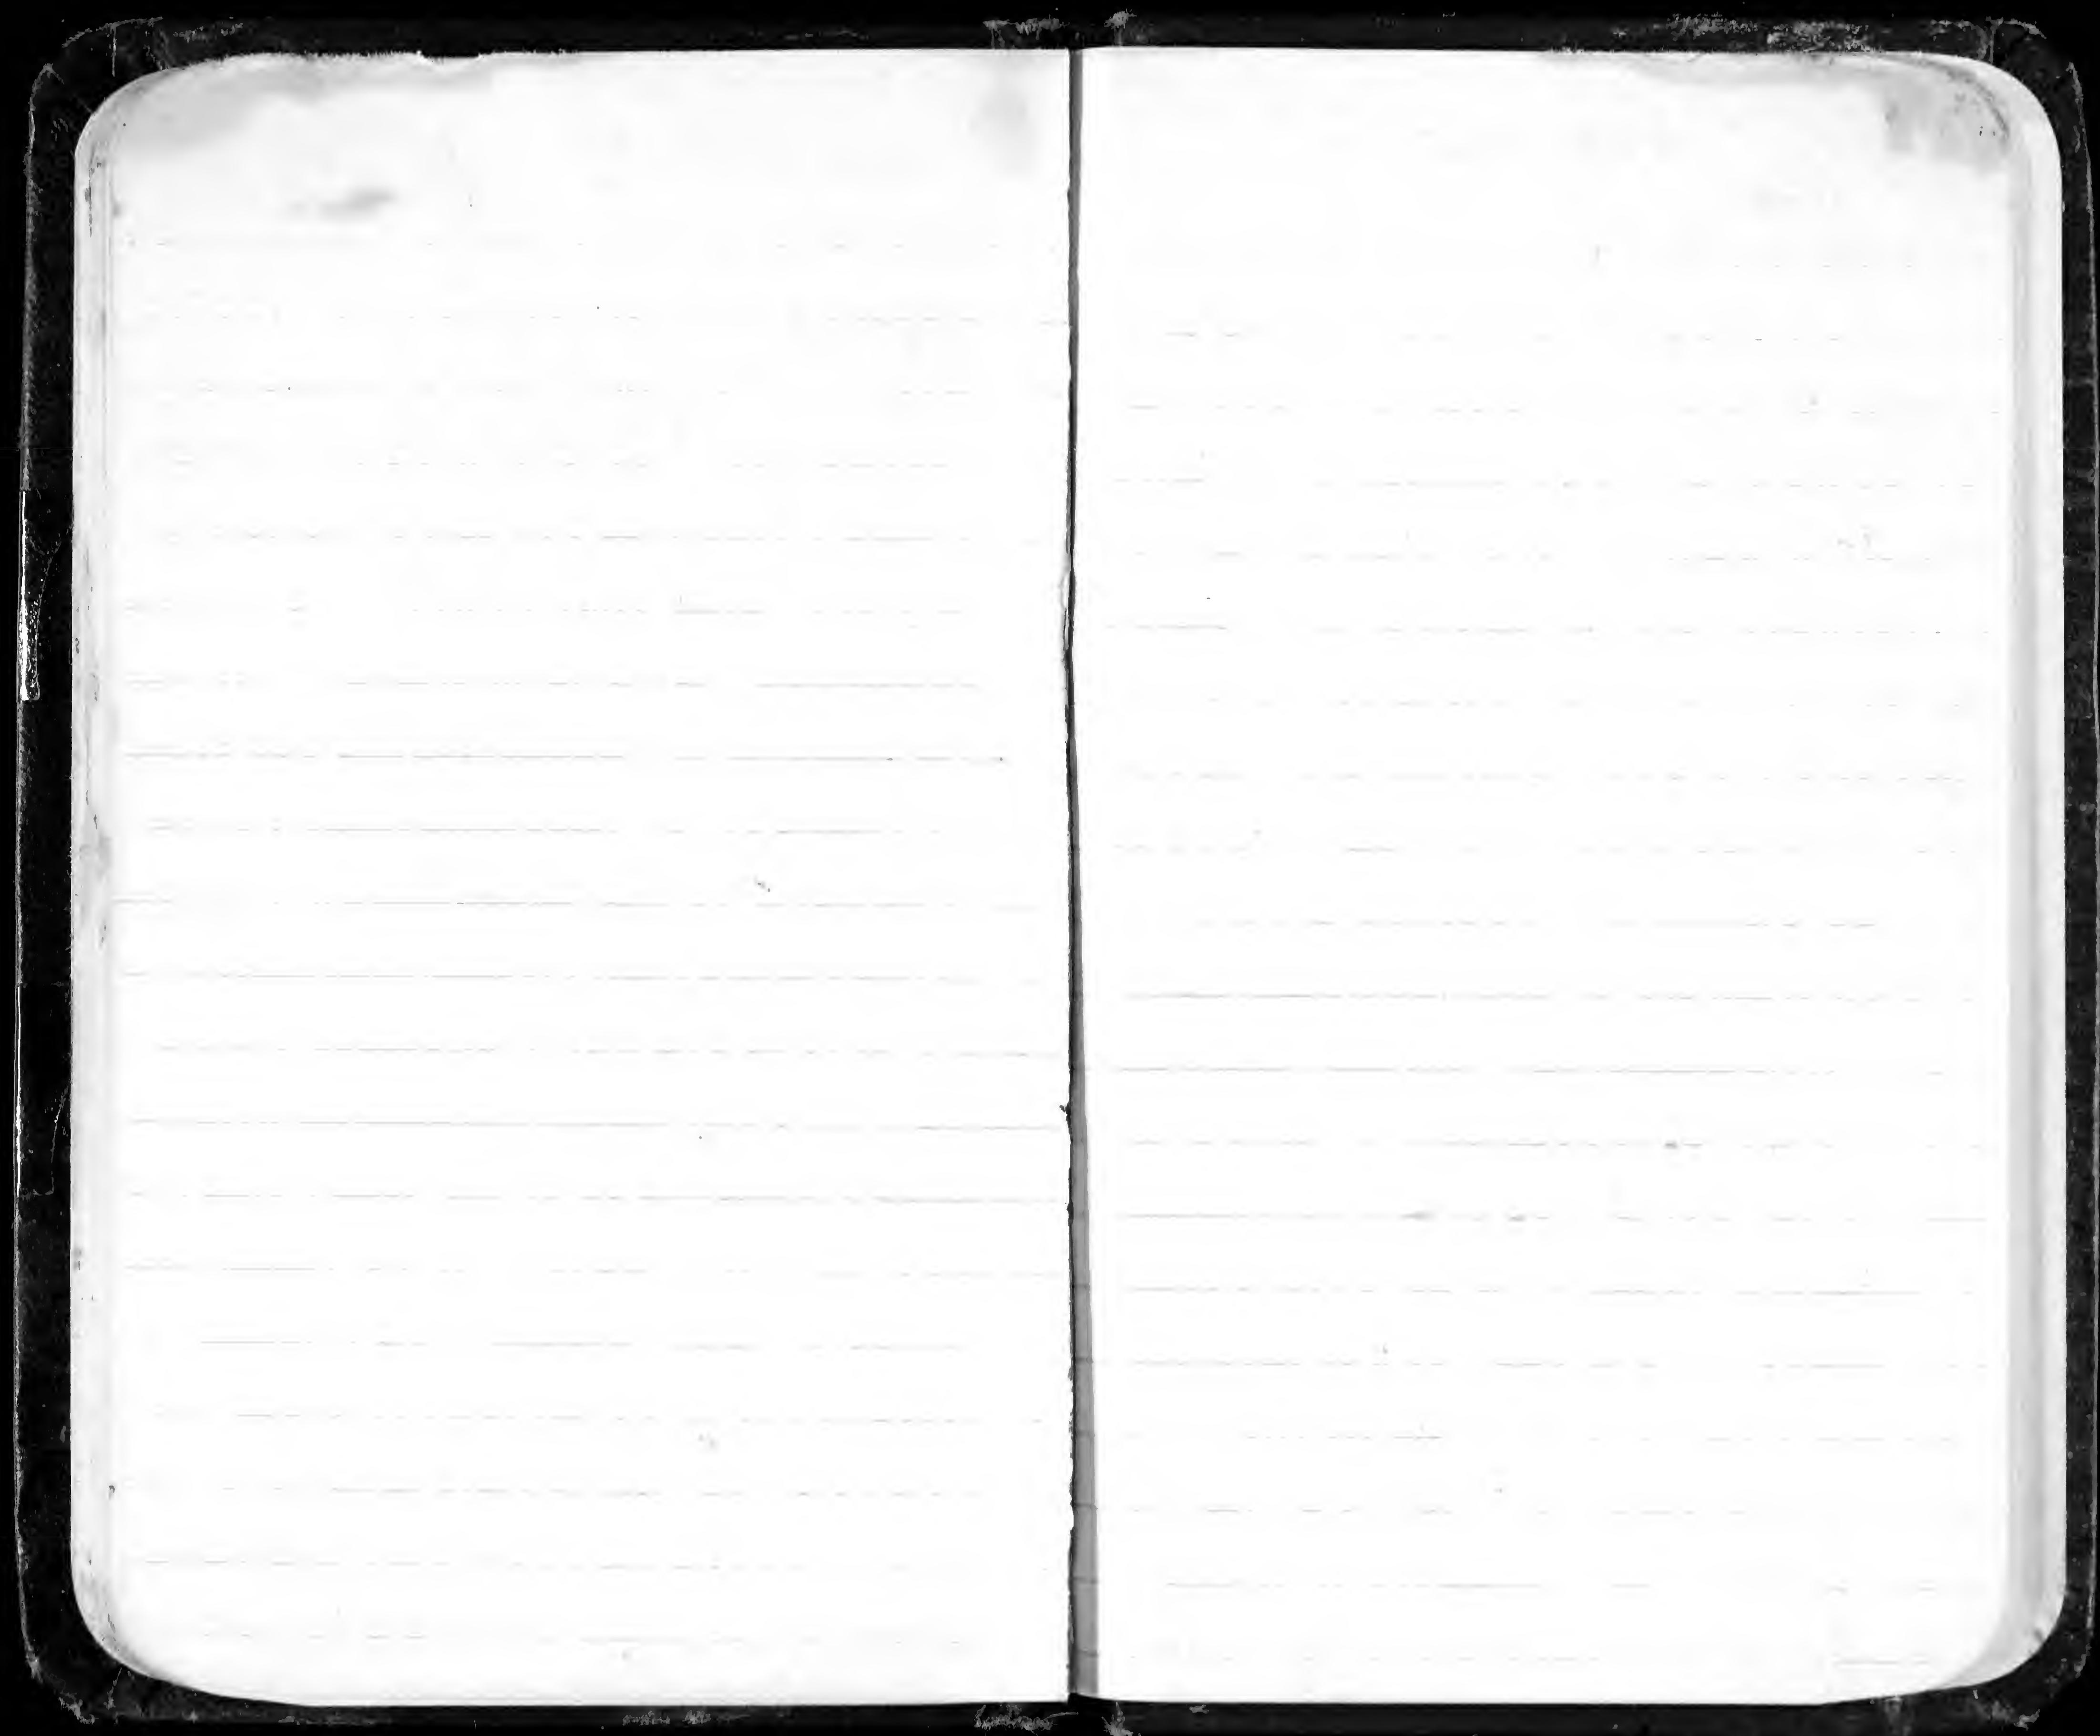

□ Coral stone and sand

● Snake-eyed skinks

● Morning Geckoes

○ Eggs (2/clutch) of Geckoes

or Skinks (uncertain).

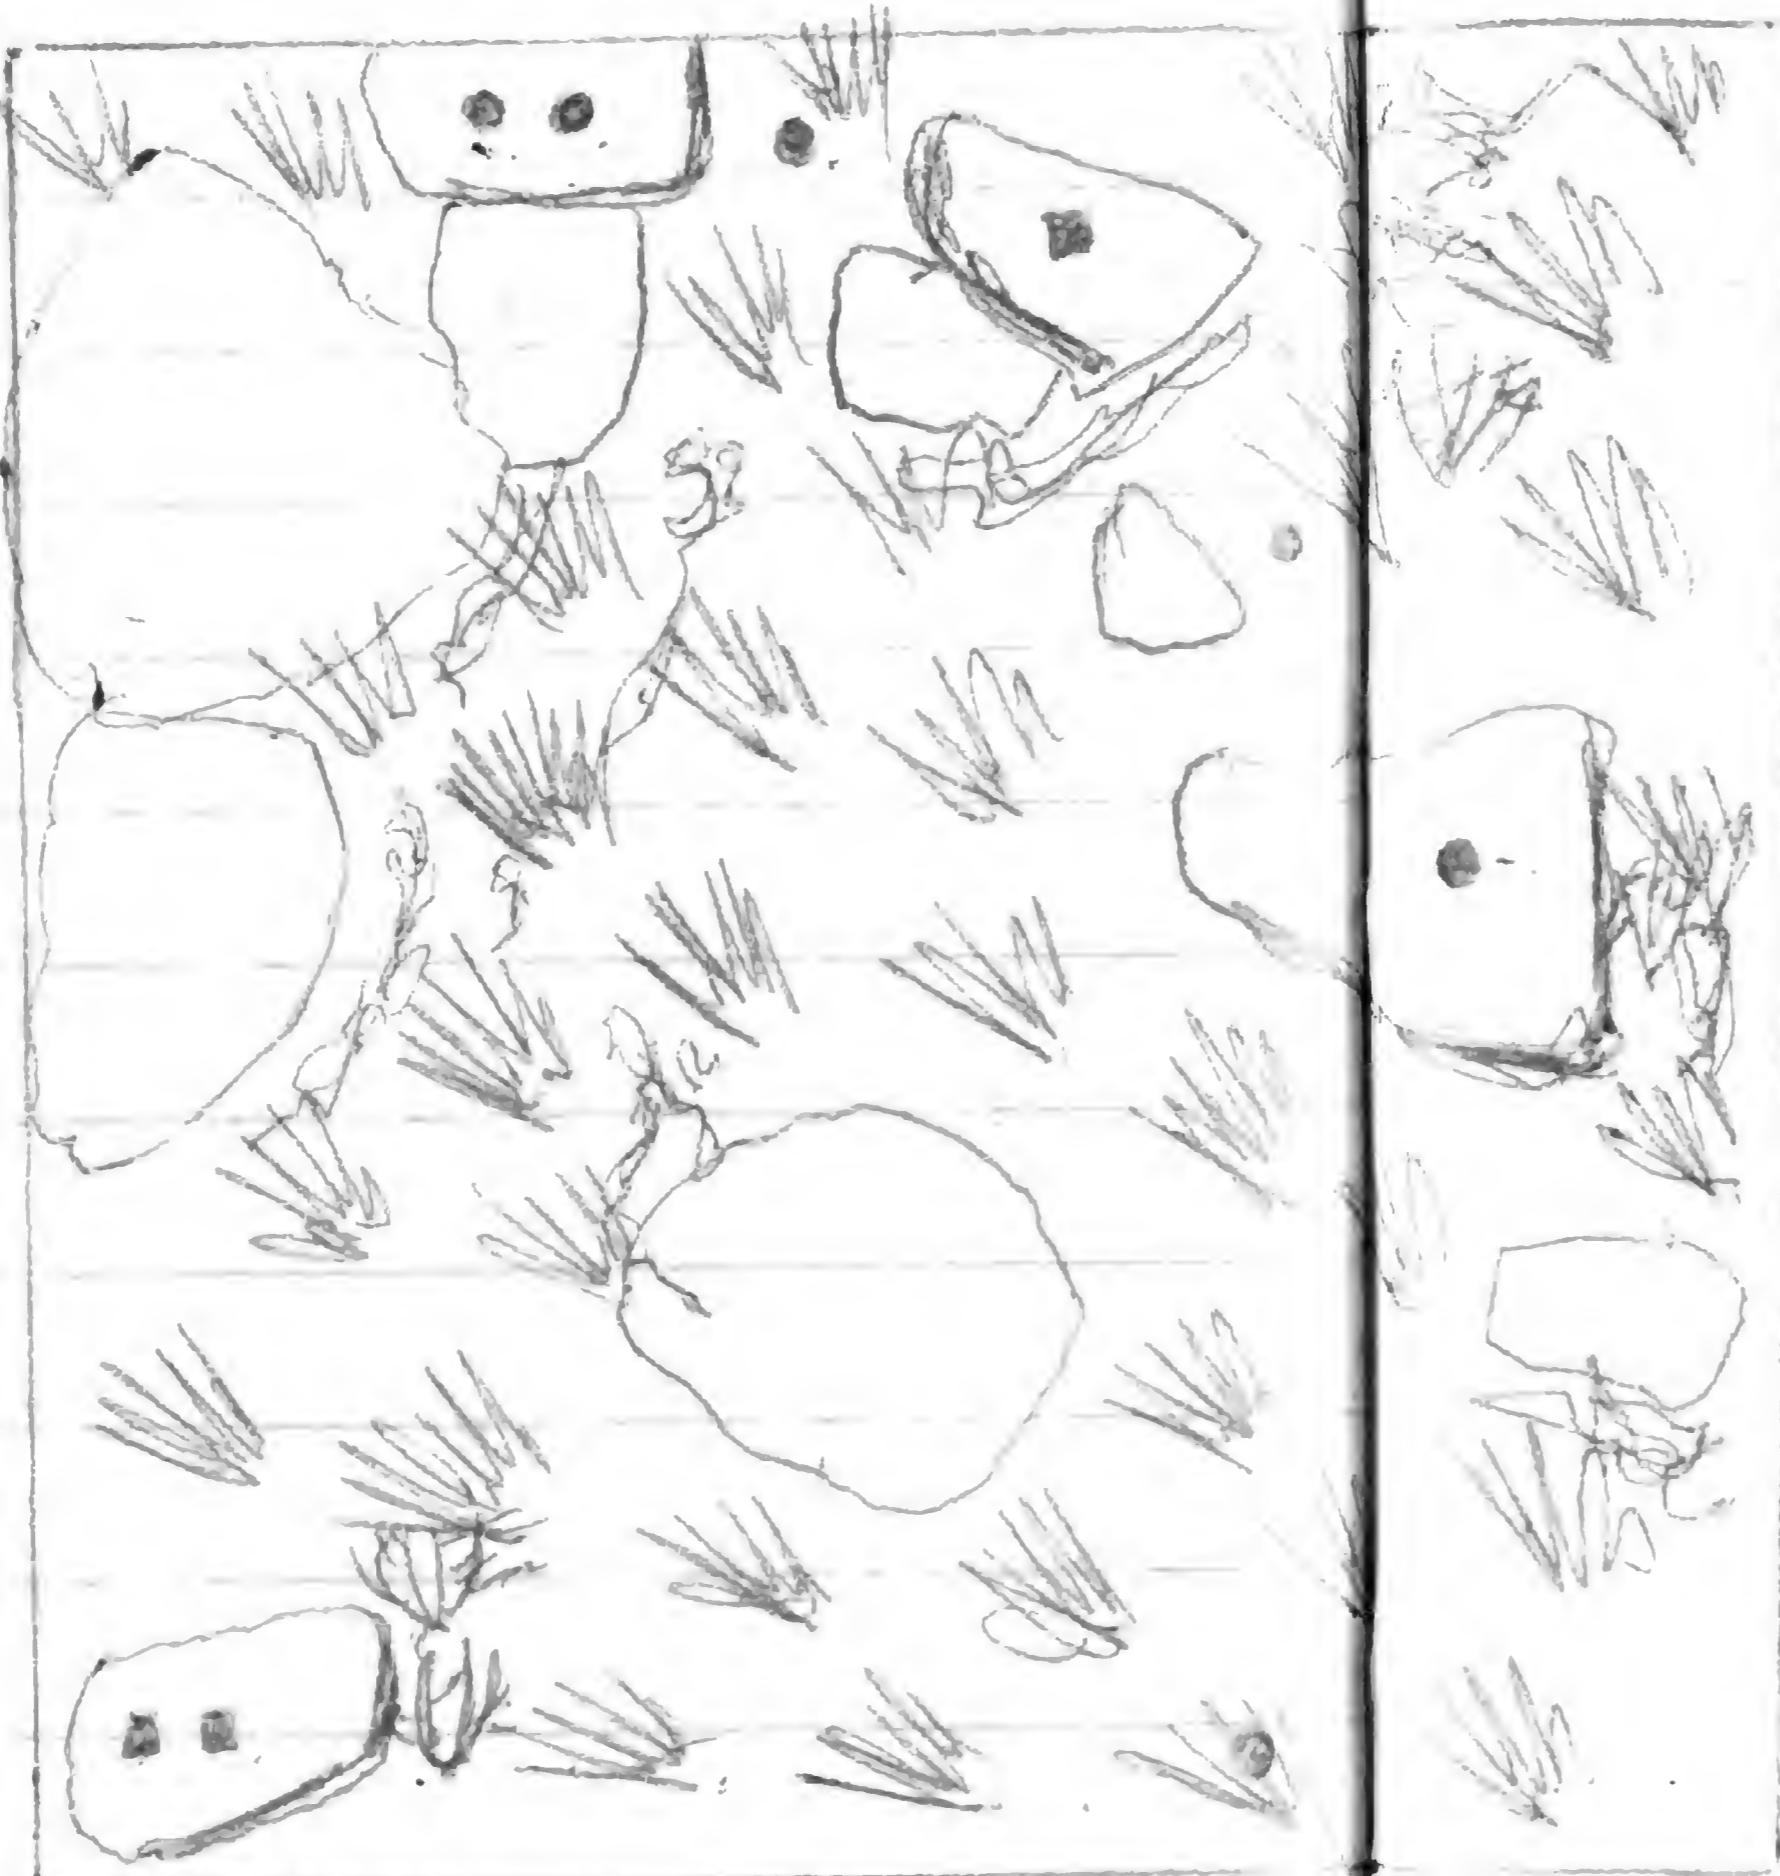

18 Feb 1967

### Herptile Survey - 1st Quadrant

1. An area of sand and scattered grass clumps (ca. 8" apart), interrupted by flat stones, was marked off in a large square 24 ft. on a side.
  2. The loose rocks were raised and checked for the presence of skinks or geckos.
  3. The grass clumps were systematically brushed to flush any herptiles present.
  4. Results: As indicated by the accompanying map, 3 Snaker-eyed ~~Geckos~~ Skinks and 3 Mourning Geckos were found under rocks. <sup>Three</sup> Two S-e skinks were flushed from grass clumps.  
2                   3
  5. ♂ S-e Skinks and ♀ M. Geckos were collected.
- (6. The study area was located on land sloping down to the beach on the leeward side of the island. The area was surveyed ca. 1030.)
- (7. Three (3) small hermit crabs and two (2) small land crabs were found in the survey area.)

Herptile Survey -  
1st Quadrant

18 Feb 1967

○ Partially buried rocks

○ Loose rocks

Grass clumps (*Digittaria*)

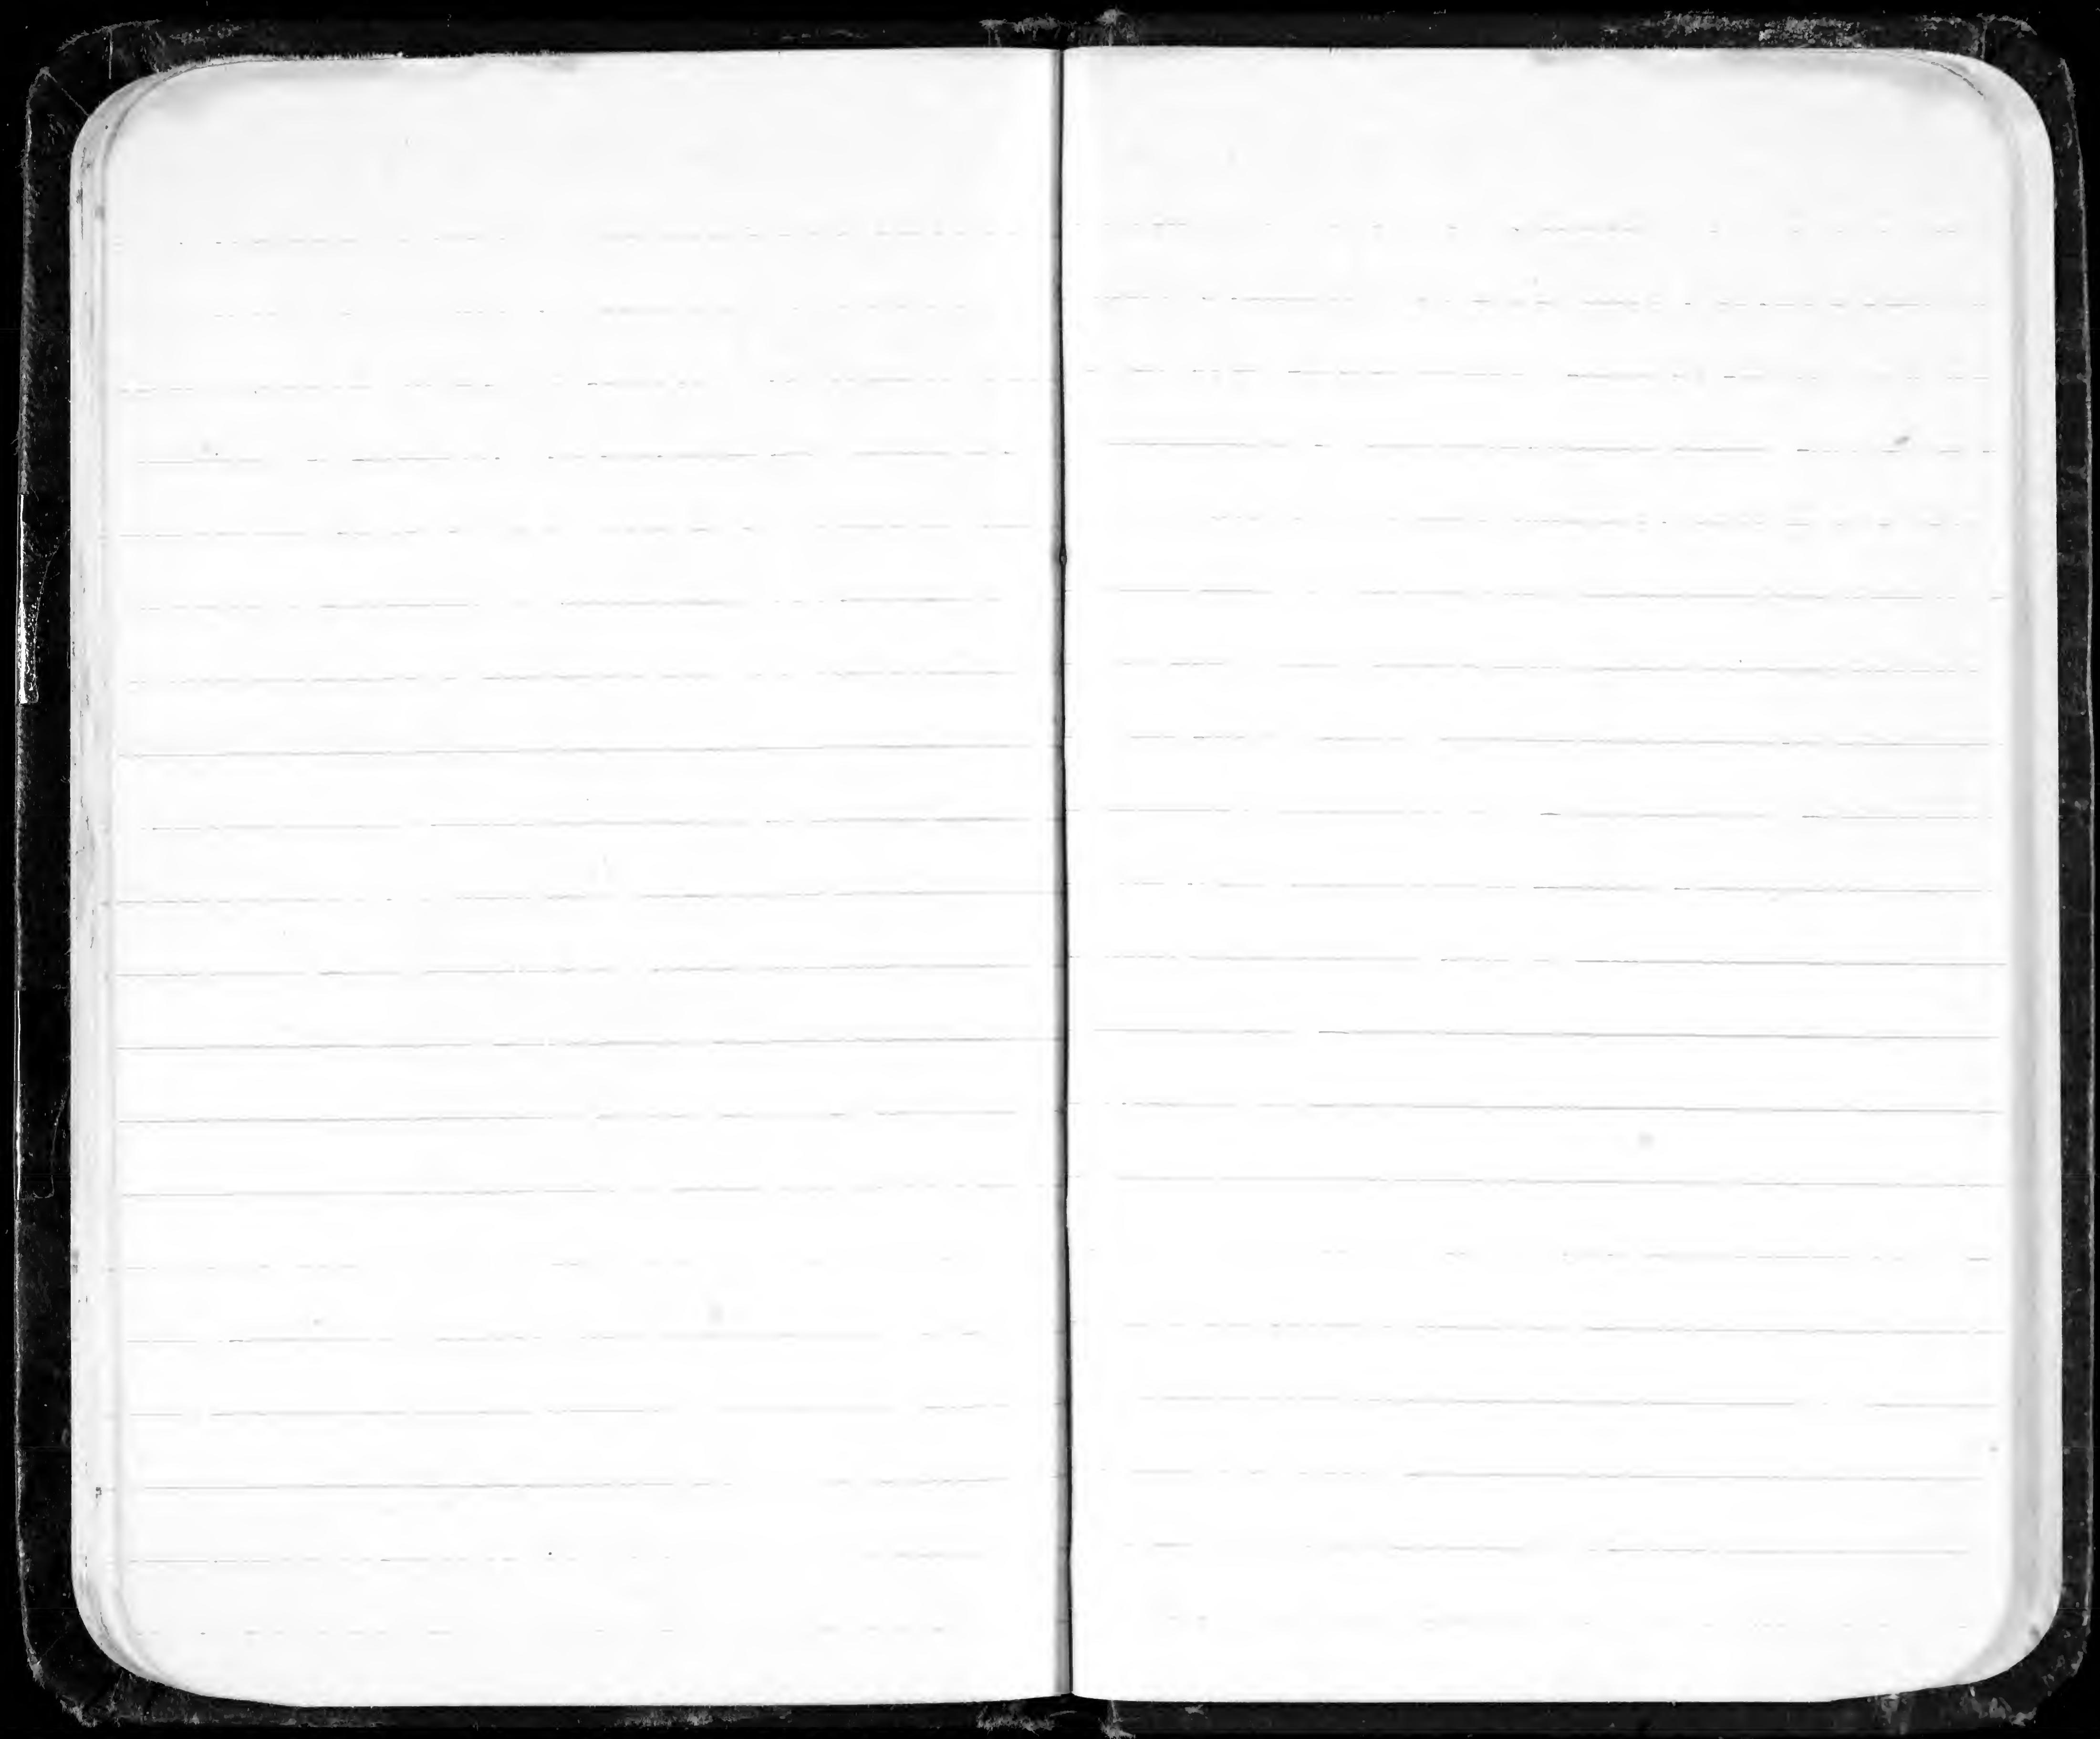

Berhavia

~~Portulaca~~

□ sand

● Snake-eyed skink

■ Morning gecko
